

Norfolk Bike Commuter

For a safer, cleaner, healthier, and better-connected Norfolk, VA through bicycle use and infrastructure.

October 17, 2023

Dear Lambert's Point City Park Steering Committee:

I am writing to extend our support to the steering committee and the establishment of a public city park at the former Lambert's Point Golf Course.

City parks and green space unite communities by providing a sense of place, improve general well-being through recreation, and beautify our urban environment. These outcomes mirror those realized through the non-automobile-centric transportation systems promoted by Norfolk Bike Commuter (NFKBC). The steering committee has likewise emphasized the importance of integrating bicycle and active transportation elements into a future Lambert's Point city park for the purpose of city connectivity as well as recreation; working closely with community partners to incorporate the Elizabeth River Trail (ERT) into a final design.

While we certainly hope to see as robust of a bicycle connection as possible and will gladly assist in the effort, regardless of its ultimate form the site of the former Lambert's Point Golf Course should be exclusively reserved for a public use city park. NFKBC thanks the steering committee for their work so far and looks forward to positive developments in the future!

Sincerely,

Corey Logan
